

# WORLD EARTH DAY

How to care for creation

- Turn off lights when you're not in the room
- Fix leaking taps
- Use durable items rather than disposable or one-use items
- Purchase and use recycled paper products
- Reduce plastic – but start with one room at a time (for example, your bathroom or your kitchen)
- Use reusable bags when shopping
- Donate unwanted items to an op shop
- Start a compost or worm farm
- Start a veggie patch
- Reduce the time you shower
- Turn electrical items off if they are not being used
- Switch to electricity that comes from renewable sources
- Use a keep cup when buying coffee
- Use reusable produce bags when buying fruit, vegetables and bread rather than plastic bags
- Use beeswax covers for food instead of cling wrap
- Purchase a bamboo toothbrush
- Buy wood or stainless steel pegs
- Spend time connecting with God in creation
